Январь 2017  
5 месяцев

### NDA Private Company

США

#### FullStack JS Developer

Developing of Article Recommendation Widget on medical topic.

I have worked in three teams (one command is about 5-7 people). In first and second was in role of FullStack JS Developer (database migrations, new business logic and bugfixes).

Every morning scrum meetings. Time accounting was performed using Rescuetime app and chrome extension.

Communication through Discord and Quip for issues tracking and documentations.

In total the company counted more than 70 people of remote developers from all sides of the world.

Used Stack: MeteorJS, ES6, React, Flux, CoffeeScript, Sequelize, Elastic Search, Druid, Postgress, GitLab, GIT.

Июль 2016 —  
Август 2016  
2 месяца

## Gallop Travel

Сингапур, gallop.travel/

### JS Dev

Developing of part of travel service with stack: React, Redux, React-Router, Redux-Thunk, BEM, LESS, Pyrus.

The experience turned out to be short, as the management decided to take a break.  
But for me this experience was useful, since it was my first fulltime remote job.

Октябрь 2011 —  
Август 2016  
4 года 11 месяцев

## IntraHouse

Чебоксары, intrahouse.eu/

### FullStack JavaScript Developer

My first job where I worked for four years and became a developer.

Developed a SPA for IntraHouse (intrahouse.eu) SmartHouse system (demo still available on intrahouse.io:8088) that is worked on smartphones, tabs and pc browsers.

Started from jqTouch and jQueryMobile, then write kind of a framework based on requirejs, socket.io, jquery, eventemitter of backbone.

Participated in the exhibition of our product in GITEX2014 in Dubai.

Additional challenges:

Secure protocol between client and server.

Store with ability to buy and upgrade customers system with license and plugins.

Used Stack: jQuery, EventEmitter, RequireJS, NodeJS, MongoDB, Socket.io, HTML5.
